EV-2 Dual Column Machine

Direct From The UK Manufacturer

Engineered quality ensures a high level of security on all machines, this is provided by industry standard RPT locks and the facility to secure the cabinets using 5 or 7 wall fixings.

All machines are fitted with a rotary coin mechanism which is precision engineered and can be configured to accept any combination of current UK or foreign coinage, up to a maximum of 5 coins.

Pre treatment and powdercoating ensures that the cabinets are protected from damp or cold conditions.
